Reactome-only provisional annotations of fixed Louvain programs
point size = overlapping genes; colour = Reactome-global ORA FDR
no pair passed global FDR < 0.05 (minimum = 0.205)
P045 — Cell Cycle
P045 — Cell Cycle Mitotic
P045 — Cell Cycle Checkpoints
P045 — Factors Involved In Megakaryocyte Development And Platelet Production
P045 — Rho Gtpase Effectors
P288 — Sensory Perception
P137 — Cell Cycle Checkpoints
P304 — Extracellular Matrix Organization
P304 — Signaling By Receptor Tyrosine Kinases
P311 — Neutrophil Degranulation
P023 — Cell Cycle
